PROFESSIONAL SUMMARY

Computer Engineer with experience in Android application development using Kotlin and Java. Contributed to mobile applications published on iOS and Android platforms, as well as freelance web development projects. Experienced in mobile application development, REST API integration, Firebase, and database operations. Currently expanding my full-stack development skills with Next.js, NestJS, TypeScript, and PostgreSQL, aiming to build user-focused, maintainable, and scalable software solutions.

TECHNICAL SKILLS

Mobile: Kotlin, Java, Android SDK, REST API

Backend & Database: Node.js, NestJS, PostgreSQL, Prisma, Firebase

Web: Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS

Tools: Git, GitHub, Android Studio, Docker, Postman, Swagger, Figma, Google Play Console

WORK EXPERIENCE

Mobile & Web Developer | Freelance

2024 – Present

- Contributed to the development of car rental mobile applications for iOS and Android platforms.
- Developed web projects for businesses, working on user interface design and application development.
- Worked on REST API integration, user interface development, and database operations.

Software Development Intern | Software Persona

April 2026 – May 2026

- Gained practical experience in database operations using SQL and web development with JavaScript.
- Participated in UI/UX design training with Figma and mobile application development training for Android and iOS.
- Successfully completed the Software Professional Development Program.

Mobile Developer Intern | Technology Transfer Office (UAM)

June 2025 – July 2025

- Participated in mobile application development processes, contributing to user interface design and application functionality.
- Contributed to software development activities involving mobile and web technologies.

PROJECTS

OtoRentACar – Car Rental | Published on iOS & Android

- Developed a mobile application featuring car browsing, rental services, reservations, and reservation tracking.
- Technologies: Kotlin, Swift, MVVM, REST API, Firebase

USIApp – University-Industry Collaboration | iOS, Android & Web

- Contributed to the mobile development of a platform connecting students, academics, and industry representatives.
- Technologies: REST API, Firebase, MVVM

RentACar – Multi-Tenant Car Rental & Operations Management Platform (SaaS) | In Development

- Developing a multi-tenant SaaS platform designed to manage multiple car rental businesses through a single system, covering company management, authorization, and reservation processes.
- Technologies: Next.js, TypeScript, NestJS, Node.js, PostgreSQL, Prisma, Docker

CoffeeHouse – Web Project | Freelance

- Developed a responsive and user-friendly website for a café business.
- Technologies: HTML, CSS, JavaScript

EDUCATION

Bachelor's Degree in Computer Engineering | Kırşehir Ahi Evran University

September 2022 – June 2026 | Graduated | GPA: 3.56/4.00

LANGUAGES

Turkish: Native | English: B1 (Intermediate)
